

StoresMate

StoresMate is a Tool Management Software for Construction Projects with the aims of;

- ◆ Enhancing control of tool inventory
- ◆ Preventing late off hires and needless additional costs
- ◆ Tracking condition of tools during the hire period

The 3 key benefits of SiteMate are;

- ◆ Tool condition can be monitored throughout the hire period helping to reduce damage bills.
- ◆ Late off-hires costs can be eliminated.

- ◆ Storeman has greater control of the Tool Inventory and reduces paperwork.
- ◆ Tracks the tool's cycle from on-hire to off-hire.
- ◆ Gives management confidence in accountability for tools used on site.
- ◆ Gives visibility of tools used on the Project with the Tool Inventory.

- ◆ Condition can be monitored each time the tool is signed out, signed over and signed back to the stores.

How it works?

- ◆ Tools delivered to site by Tool Hire Company and signed for by Storeman.
- ◆ This also applies to company owned tools.

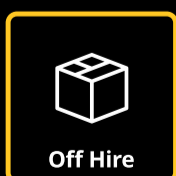

- ◆ Storeman tags tools with a QR Code.
- ◆ QR Code is scanned and information added to the Tool inventory on app, including tool condition and planned off-hire date.
- ◆ Further details can be added about the tool in the Storeman app.

- ◆ Tools can be scanned out via the StoresMate app to authorised users by an assigned QR Code.
- ◆ Once scanned, the Tool inventory is updated to show time, allocation date and who the tool has been assigned to.
- ◆ Allocated tools can be scanned over to other authorised users via the StoreMate app.

- ◆ Allocated tools are returned to the stores and the Storeman scans the tools back into the stores.
- ◆ Updated details of the condition of the tool can be added by authorised users.
- ◆ Tool inventory is automatically updated when information on tool condition is inputted.
- ◆ This also details when a tool has been reallocated to a different user, with time and date of the transaction.

- ◆ The dashboard in Storeman's app will alert the Storeman of impending off-hires.
- ◆ The Storeman will remove the QR Sticker when handback to Tool Hiring Company and central company stores.
- ◆ All condition details are available in the Tool inventory.
